

Evan Weinman

Front-End Web Developer

Phone: 973-525-8650

Website: <https://www.linkedin.com/in/evansamuel/>

Email: esweinman@gmail.com

A programmer and developer trained in innovating digital infrastructure to be utilized by a diverse range of businesses. Highly adept at providing impeccable customer service and training IT professionals to thrive within their roles. Harmonizes the vision of stakeholders to optimize processes and implement organization-wide change. Seeking the next professional challenge within a prominent tech company in a role that blends technical knowledge and leadership capacity to strengthen online services while enriching the lives of the consumer.

SKILLS

Expertise: HTML5 | CSS3 | JS | Python | React | Linux | Bash | MySQL | JQuery | Java | C# | Bootstrap

Interpersonal: Cross-Functional Leadership | Cross-Cultural Communication | Teamwork | Remote Team Management | Relationship Building | Client Service | Conflict Resolution | Lifelong Learning | Developing Talent

EXPERIENCE

Kean University

Spring 2020. (Remote)

Researcher

- Investigated C# to determine if its an appropriate introductory programming language for students as an alternative to Java.
- Compared to Java on factors such as verbosity. IDE options, and common use cases.
- Explored complementary technologies, such as SQL and Winforms, and their ease of use in a C# environment.

Kean University

Summer 2020. (Remote)

Researcher

- Investigated deep learning recurrent neural network (RNN) models that enabled an AI chatbot to respond to queries in English, Spanish, and Russian with the ultimate goal of producing a new form of text prediction.
- Curated an SQL database used to store input and output from scripts.
- Developed scripts read in multiple languages and graphed RNN model results using a python graph script.
- Collaborated with a team of researchers, programmers, and academics to bring this project to life from its conceptualization to implementation stage.
- Implemented code and ran simulations to great success and created a precedent that would allow the project to expand into Greek, German, and French in the future.

Freelance

2014-2018. Madrid, Spain

Business English Instructor

- Coached engineers, executives, supply chain strategists, and university students to wield the English language with confidence both personally and professionally.
- Built and sustained relationships with clients by tailoring curricula to their needs and providing attentive service.

EDUCATION

Kean University

2021. Union, New Jersey

Bachelor of Science in Informational Technology

GPA: 3.8 | **Accolades:** Dean's List (All Semesters)

Coursework: Web Client-Side Programming | Data Structures | Database Systems | Mobile Application Development | Java Programming | Unix/Linux | .Net Framework & C#
